

TORRINGTON PARKS & RECREATION

Rocket Science

Build & launch Wicked Cool's favorite solid fuel rocket, the customizable E2X; perfect for the young aerospace engineer. Keep a Commander's Log as you investigate the solar system, design a satellite, and build a space base for an astronaut. Blast off with a solid fuel, high-flying, rocket launch at the end of the week (weather permitting). Continue your outer space journey and make galactic slime, map distant constellations, undergo astronaut training, saving a parachuting "eggstronaut" and grow alien cells in a test tube.
